

Code for Canada skills challenge 2017 - Developers

Please spend no more than 30 minutes on your submission. Be sure to read all the way through the instructions before beginning, and time yourself once you start.

The task - Look at [this dataset](#) representing building code violations. Write a brief program in the language of your choice to summarize the data. Your program should calculate:

- The number of violations in each category
- The earliest and latest violation date for each category

You can use your preferred programming language, and decide on the presentation format of the resulting data.

Do not spend more than 30 minutes on this challenge.

Submission instructions

Please attach a zip file containing your entire submission in response to the email you received containing this challenge.

Submissions must be received by Tuesday, June 27 at 12 p.m. EDT.
